(8-74)

IN ORDER TO ASSURE PROMPT AND ACCURATE
ATTENTION TO YOUR PARTS ORDER, BE SURE
TO SUPPLY THE NUMBER 7 IN FRONT OF THE
SEVEN DIGIT PART NUMBER WHEN ORDERING.

EXAMPLES:

NUMBER LISTED IN MANUAL	ORDER NUMBER
0910287	70910287
4393527	74393527

FOREWORD

This Parts Manual contains parts information on the unit or units specified on the cover.

The Basic Engine Indexs are provided as means of identifying and locating parts pertaining to the basic engine only.

The Optional Equipment Index is provided as a means of identifying parts and accessories installed on the unit at the factory. Some optional equipment may be substituted for basic engine equipment or added to the basic engine.

The Engine Serial Number and Optional Equipment Catalog Number applying to each engine are stamped on the Engine and Optional Equipment Plate located on the left-hand side of the engine. See following illustration.

CATALOG NO.	OPT. EQUIP.	CATALOG NO.	OPT. EQUIP.	CATALOG NO.	OPT. EQUIP.
					

E-2398

Optional equipment parts are found by identifying the Optional Equipment Catalog Number in the nomenclature heading and/or immediately following the description of a part.

Reference Numbers (Ref.) above the text title block are to be disregarded unless the numbers are stamped on the Engine and Optional Equipment Plate or some other data refers the user to the reference number.

Attaching parts, such as capscrews, nuts, etc., are indented immediately following the parts which they attached or are attached to.

The terms "right" and "left" used in the parts list are determined by standing at flywheel end of engine and facing the flywheel.

Always give Engine Serial Number when ordering parts. To obtain shipment promptly give part number and part nomenclature. Order parts from the dealer covering the local territory.

Always indicate complete address where parts are to be shipped and specify by what means material is to be shipped. Confirm all telephone or telegraph orders in writing.

Claims for shortages or errors in shipment must be made immediately upon receipt of shipment. Claims for damages in shipment must be filed with the transportation company. No responsibility is assumed for delay or damage to merchandise while in transit.

At the time this parts catalog was published the listed part numbers were current. It is our policy to constantly improve our products and therefore, part numbers and design may change. When ordering parts, verify part numbers through your dealer's parts catalog.

NOTE: METHOD OF SUPPLY CHANGES
PISTONS, CYLINDER SLEEVES, SLOW-MOVING PISTON AND SLEEVE KITS

In addition to piston and sleeve kits, it has also been customary to supply their component pistons and cylinder sleeves as individual items. Reworking of our inventory is in process that will change the method of component supply to:

- . A piston kit which includes one (1) each piston, piston pin, piston ring set, two (2) piston pin retainers and necessary instruction sheets.
- . A sleeve kit which includes one (1) cylinder sleeve and the necessary sleeve packing rings and instruction sheets.

Individual pistons and sleeves as such will be superseded by their respective kits as stock rework occurs. In the interim please continue to order individual component pistons and sleeves as in the past. Commence ordering the new kits as you are made aware of supersessions through MNI supplements or order change by the Central Parts Operation. We will continue to supply on a piece part basis piston pins, piston ring sets, piston pin retainers and cylinder sleeve o-rings.

Also, where sales movement justifies, the combination piston and sleeve kit is still available. Slow-moving piston and sleeve kits will be superseded through MNI supplement by the appropriate piston kit and sleeve kit.

This new concept provides a number of benefits, some of which are:

- . Less Order Picking Time
- . Inventory Flexibility
- . Customer Convenience
